## **DATA SHEET Galvanised Wire Rope**

Galvanised wire rope is commonly used in mining for a variety of purposes. It is made up of multiple strands of wire that are twisted together to form a strong and durable rope. Due to its strength and durability, galvanised wire rope is ideal for use in mining environments where harsh conditions and heavy loads are common.

## **Features**

- Strength
- Longevity
- Flexibility
- 7 x 7 construction

## Material

· Galvanised steel

Part Number	Wire Diameter (mm)	Reel Length (mtr)	Construction	Finish	Core	MBF	Weight
ROPE-GAL-6-500	6	500	7x7	Galvanised	Wire	20.2kN	0.14kg/1m
ROPE-GAL-6-1000	6	1000	7x7	Galvanised	Wire	20.2kN	0.14kg/1m
