

The Right Connection®

# API Valves

### Application

API Valves are used for bottom loading and unloading of petroleum tankers. Valve nose shape and opening comply with American Petroleum Institute standard (API RP-1004) enabling Dixon API Valves to interchange with other brand items made to the same specifications.

### Models

Three styles are available;

- Load model without handle
- A load/unload model with a pull up to operate handle to allow manual opening
- A load/unload model with pull down to operate handle to allow manual opening

### Design

Load/unload versions feature an ergonomically curved handle that opens with a short 62° stroke. Available with a fixed or removable handle.

### Materials

Aluminium, anodised hard coat aluminium

### Maintenance

Valve can be completely rebuilt without removing from truck.

Chemical resistant crank seals & poppet seals (PTPE seal optional).
