DATA SHEET 6mm Galvanised Chain

Dixon's galvanised chain is a general-purpose chain made from low carbon steel and does not have a specific weight rating. It is conveniently packaged in a 25kg bucket. It is often used in conjunction with other anchoring methods such as bolts and wire rope to provide additional stability. Galvanised chain is a versatile and essential component in underground mining operations, providing strength, durability, and corrosion resistance in harsh conditions.

Features

- Strength
- Durability
- Versatility
- · Corrosion resistance

Finish

Galvanised

Notes

• 25kg Buckets
