## DATA SHEET 6mm D Shackle

D shackles, are commonly used in underground mining. They are shaped like the letter "D" and have a threaded pin or screw that connects the two ends of the shackle. D shackles are made from high-strength steel and are designed to withstand harsh environments, making them an ideal choice for many mining applications.

# Q.

### Features

- Heavy duty
- Screw closing method
- Corrosion resistant

#### Finish

• Galvanised

#### Notes

• 250 per bucket
