

Dixon™ One-Piece Flange Adaptors

Applications:	<ul style="list-style-type: none"> Used in the transfer of water, brine, water-based chemicals, water-based acids, and gelatinous proppant (sand) slurry used at hydraulic fracturing sites Used with HU200400RN two-piece nut
Features:	<ul style="list-style-type: none"> Flange x female or male hammer union straights (standard or short length) 45° elbows in female and male (flange x hammer union) No welds or pipe threads to deteriorate and cause premature leakage Two-piece nut is pinned and bolted for perfect alignment All 4" figure 206 threads are interchangeable with other reliable brands All 4" 150# flanges are compatible with other reliable brands
Materials:	<ul style="list-style-type: none"> Iron adaptors meet ASTM standards Forged steel nuts meet AISI standards

Hammer Union Caps and Plugs

Applications:	<ul style="list-style-type: none"> Prevents leakage of hydraulic fracturing fluids from hammer union connections. Used in pressurized service on site or when transferring equipment.
Features:	<ul style="list-style-type: none"> Forged steel construction ensures longevity, reliability, and performance Designed with larger handle for easier installation and disassembling Design includes a handle hole to attach chain or cable
Material:	<ul style="list-style-type: none"> Forged steel meeting AISI standards
